

Changing Places Survey

This survey will take five minutes to complete and is open for feedback until 23 September 2017.

The 2017-18 State Budget announced \$200,000 to fund partnerships to build five Changing Places toilets and we need your input to tell us where they are needed most.

What do we want to know and why?

We want to hear from people with disability about where a Changing Places toilets should be built in South Australia.

What is a Changing Places toilet?

A Changing Places toilet includes a range of features not available in standard accessible toilets, such as a height-adjustable adult-sized change table, a tracking hoist system, non-slip flooring and increased space to accommodate a person in a wheelchair and up to two carers.

The South Australian Government is committed to improving access and inclusion. There is widespread recognition that Changing Places are an example of best practice and can enable people with disability to participate in society with more independence and dignity.
