To Whom it may Concern:

I strongly agree with the general nature of the SA Government's newly proposed Biodiversity Act, and have read the explanatory guide. I agree specifically with all Survey Questions in regard to this Act, except for nos 5,13,14 &18.

As a member of the Council of the Field Naturalists Socy of SA, I congratulate the Minister on her foresight in regard to these policies, which I consider long overdue.

Thank you for considering my response, and I look forward to celebrating the new Act, and hearing from the Minister as to overall results of this consultation.

Kind regards,

18/2/25
