

SAPS Safety, Wellbeing and Injury Management Framework

Framework

- States SAPS commitment to WHS and IM systems; describes implementation requirements.
- Sets out regulatory environment (Crown self-insurance, registration and regulation, and actuarial valuation).
- Commits SAPS to strategy and standards.
- Sets out audit framework (internal and external).
- Cross-sector consultation processes, strategies and policy.
- Sector-wide performance reporting and monitoring.
- WHS and IM Systems and data.

Strategy

- Sets objectives for SAPS improvement and measures.
- Addresses contemporary WHS and IM issues.
- Linked to the National Safety Strategy.
- Informs whole of sector reporting and benchmarking.
- Will guide agencies planning and measurement.
- Agency engagement and commitment.

Standards WHS and Injury Management

- Ensures consistency by agencies across SAPS in Safety, Wellbeing and IM implementation.
- Ensures legislative compliance and compliance to ISO 45001 (WHS Management System).
- Provides assurance to RTWSA regarding quality of systems in place.

Agencies

- Develop and implement systems and strategies in accordance with Standards and Plans to support SAPS Strategy.
- Develop and implement their own policies, procedures and standards as required.
- Implement internal audit, management review and improvement plans.
