

Good afternoon.

My kids popped their feedback in the post on Thursday.

We hope it makes it to you in time to be included as a submission.

In case it doesn't, please find attached photos of their work.

Thanks.

Save the birds!

Big trees have tree hollows, and cutting them down, means that lots of birds won't be able to nest in them!

Please protect our environment

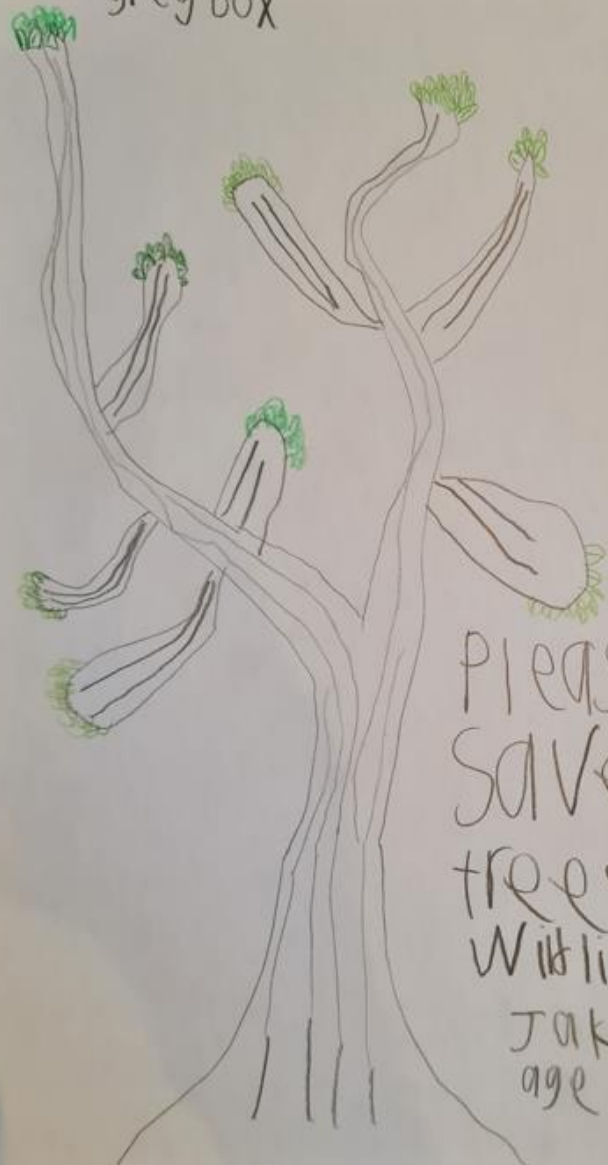

South-eastern Red-tailed Black Cockatoos

These big, beautiful birds are on the prospect of extinction, with only 1,500 left in south-eastern Australia.

Please help these birds and many others by protecting big trees
