

NORTHERN EYRE HEALTH CARE PROJECT

Invitation for healthcare
provider collaboration

October 2025

**Northern Eyre
Health Care**

A project by Northern Eyre
Peninsula Health Alliance

Northern Eyre Health Care and regional healthcare providers – an invitation to collaborate!

What is Northern Eyre Health Care?

Northern Eyre Health Care is a three-year project delivered by the Northern Eyre Peninsula Health Alliance (comprising the district councils of Cleve, Franklin Harbour, Elliston, Kimba, Streaky Bay and Wudinna). The project aims to improve access to primary healthcare services within the region, and increase community capacity to attract and retain GPs and other healthcare professionals.

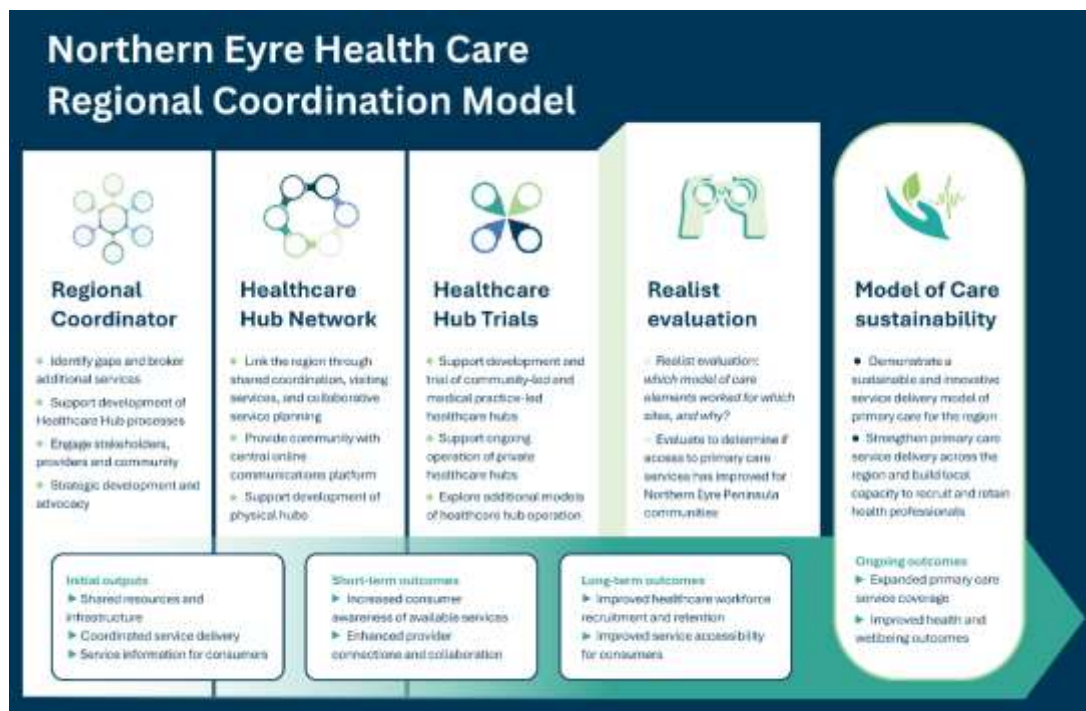

Over the past 12 months the project has conducted extensive community consultation and collaborated with key stakeholders to co-design a new Model of Care that will be implemented and evaluated over the remainder of the project lifetime to December 2027.

Consultation revealed significant gaps in available primary healthcare services, and barriers to service access, including lack of consumer information. Also identified was the need to provide visiting and resident healthcare providers with more support to deliver sustainable services across the region.

The new Model of Care

The Northern Eyre Health Care model of care is a Regional Coordination model centred around coordinated healthcare service delivery, featuring two core components:

1. *Regional Coordination Service*, delivered by a *Regional Coordinator* to build regional capacity, enhance communication, and integrate services; and a *Regional Coordination Website* including an interactive service calendar and service directory, providing quick links to healthcare providers.
2. *Healthcare Hubs Network* as a vehicle to improve access to multidisciplinary care, linking existing and developing physical sites that act as central access points for multiple services, and providing an overarching regional model of connected service delivery.

What can the project offer service providers across the region?

- **Ongoing promotion of local healthcare services** - via the Regional Coordinator, Website, Monthly Newsletter, Community Education Events and other complementary promotional mediums.
- **Support of local service provision** – the Regional Coordinator will work closely with providers to broker services where they may be needed in the region and monitor any risk of duplication. They will also advocate for providers and provide support to meet any barriers to service offerings, such as facility access, travel burdens and consumer connections.
- **Opportunity to connect with healthcare providers in the region** – the project promotes knowledge sharing, collaboration and collegiality. By increasing regional provider connections, the project aims to improve the workforce experience and support increased attraction and retention of healthcare professionals.

What is your investment?

The above benefits will not require any financial investment, other than your time to connect with the Regional Coordinator and maintain your visiting and contact details.

The Regional Coordinator role will commence in early 2025 and will seek to connect with you as soon as practical.

The Northern Eyre Health Care website will be launched in early 2025, after which time you will be offered the opportunity to input your contact details and service information for the directory. You will also be offered ongoing access to update your visit/service dates on the regional services calendar and maintain your general information as required.

Next steps?

Prior to the Regional Coordination Service coming online in 2025, the Northern Eyre Health Care project team – Jodie Ween and Amy Williams – are keen to meet with you (in person, by phone or online), to:

- Check the accuracy and currency of information collected on your service in the region.
- Offer you the opportunity to complete the [Healthcare professional working in Northern Eyre Peninsula survey](#).
- Learn about your experience of service provision in the Northern Eyre Peninsula and your plans for maintaining or developing your services.

Click this link to book a Teams meeting at a time that suits you, or contact Amy on 0409 946 349 or amy.williams@sa.gov.au to arrange an in person meeting.
